# Smart Home Alarm Kits

Smart Home Alarms are secure, expandable, easy to install and controllable at anytime, anywhere through your smartphone. The Smart Hub is at the heart of the connected system allowing you to add up to 40 devices to tailor your system perfectly for your home.

Smart Home Alarms are secure, expandable, easy to install and controllable at anytime, anywhere through your smartphone. The Smart Hub is at the heart of the connected system allowing you to add up to 40 devices to tailor your system perfectly for your home.

## Easy to install

The components don't require any wired connections which makes them easy to install anywhere. The components in the kits are also pre-linked to the Smart Hub, so setting up is simple.

## Secure

Yale uses 868MHz technology – a frequency that is tightly controlled, making it a clearer channel with less interference to help deliver maximum performance and security.

## Totally controllable

The intelligent app allow you complete access to your home security. Whether you need to check that your alarm is armed, or view images from a PIR camera, you are in total control for complete peace of mind.

## 3 easy steps for Smart Living

1

### Choose an alarm

A starter kit contains everything you need to get started. If you are looking for a standard alarm kit, without an app, the SR-1100i is ideal. For more convenience and remote control there are the Yale Smart Home alarm kits. If you upgrade from a standard alarm kit to a Smart Home alarm kit, all accessories can be used with Smart Home alarm as well.

2

### Add accessories

You can enhance the effectiveness of your kit and tailor your system by adding up to 20 accessories with your standard kit and up to 40 accessories to your Smart Home alarms.

3

### Easy installation

The accessories contained in the starter kits are paired. Download and set up the app, activate and test accessories, mount accessories and optimise your system – it's that simple!

## Smart Home alarm kits

The SR-2100i is a starter kit, perfect for house or apartments. Yale Smart HUB contains loud internal Siren

The SR-3200i is a Smart Home camera kit. You can view images of your home anytime on your SmartPhone as well as activate your alarm system.

The SR3800i alarm kit will give you additional peace of mind and security wherever you are thanks to a dual connection method. Connect either with your ethernet and/or insert a SIM card. The GSM connection will be your back up solution, in case of an internet breakdown. This alarm kit can also be ideal for your summer or second home with no internet connection.

## Standard alarm kits

The SR-1100i kit is a keypad operated system ideal for small houses or apartments.

The SR-1200e Alarm is a basic keypad operated system ideal for house installation. You can add up to 20 accessories to tailor the system to your home.
